

This discussion will last for 3 weeks covering Units 1, 2 and 3. Ensure you include appropriate citations and references in all your posts (this is not included in the word count for each week's post/submission).

Discussion Topic

Read the article by Metcalf (2024) and discuss the impact of industry 4.0 and/or Industry 5.0 on the sector in which you are involved or interested.

Instructions

- Identify a specific incident (not covered in your reading list) where the failure of an information system has had a significant impact.
- Your post could consider a range of impacts of the failure, including: the implications to customers, the economic cost, the reputational cost, or any other relevant impacts.
- Review lecturecast 1 and read papers provided in the references list.
- Go to the discussion forum and create an initial post of your contribution to the discussion.

You should demonstrate that you understand the topic covered and ensure you use references to academic literature (journals, books, reports, etc.).

Learning Outcomes

- Understand the applicability and challenges associated with different datasets for the use of machine learning algorithms.
- Systematically develop and implement the skills required to be an effective member of a development team in a virtual professional environment, adopting real-life perspectives on team roles and organisation.

Assignment Guidance

- Your initial posting should respond to the question and be at least 200 words long. This should be labelled as 'Initial Post'
- You will then respond to **at least 2 of your peers' posts** in unit 2 (each labelled as 'Peer Response'). To guide your responses, look at the guidelines for the peer review process on the [Department's homepage](#). Focus on the possible measures that could have been put in place in order to prevent the incidents highlighted by your peers. Please try to limit your response posts to **200-300 words maximum**, so that others may be encouraged to reflect on, and respond to your ideas.
- In Unit 3, you should provide a summary post based on your initial post, the feedback from your peers and the content of the three units. Please label this as 'Summary Post'. It should be **300 words**.
- Referencing: When you have referred to other authors thoughts, ideas and opinions in your posts, you must reference the author as you would in an academic assignment using the UoEO Harvard reference style.
- You will be not be assessed on your contribution to this forum throughout the module, but the tutor will post group feedback via a module announcement.
- This activity forms a component of your e-portfolio which you will submit in unit 12. All e-portfolio activities are intended to demonstrate your ability and strengths through evidence and reflection.

Please also note that all forums, except Module Announcements, are automatically set to **unsubscribed**. In order to receive notifications about your post, or anyone else's posts you have interest in or have commented on, the subscribe button must be manually turned on for **each separate discussion**. Subscribe by scrolling to the bottom of this forum and selecting **Subscribe to this forum**.
